

Credit Name: CSE2130 - File Structures & Exception Handling
Assignment Name: WordCount

Q: How has your program changed from planning to coding to now? Please explain?

A: I was stumped in this mastery because reading and writing a text file in java is easy but counting the words in the file seems a bit difficult. So I did a bit of research on how to do it and found a website that explained what to do and what not to do. So I used it as my outline and went through coding the mastery without plagiarizing the outline. After coding how the program reads which parts of the file and counting and manipulating this data, I was finished and started to test out the code found no errors during the testing phase
